Art Unit: 3662

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 20-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Lines 1-3 of independent claim 20 are indefinite and unclear in context in that the preamble of claim 20 presents the claimed apparatus as being a "bistatic radar," but lines 2-3 of claim 20 covers arrays of transceivers that would not at all be bistatic.

On lines 9-10 of claim 20, the phrase "at least one of transmitted and received signals being provided to an output signal of the mixing device" is unclear as to what is meant in context by signals "being provided to" an "output signal." What does it mean for signals to be provided to a signal?

Lines 11-12 of claim 20 are indefinite and unclear in context in that there is no structure recited to perform the recited function of providing a "time-synchronous control."

Dependent claims 21-38 are unclear in that they depend from unclear independent claim 20.

3. Claim 20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 3662

4. Claims 21-38 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

5. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

Please see the handwritten changes to the information for Mr. Christian Zott on the Declaration and Power of Attorney received 18 March 2005.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

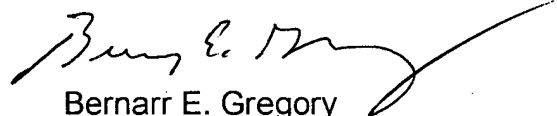

Klennert et al (U.S. Patent 6,614,388 B2) is of interest for showing an array of radar sensors as claimed in claim 20 with the mention of analysis of cross echoes; however, there is no disclosure of the claimed "analyzing unit ..." of claim 20. Please see the Abstract; column 2, lines 45-55; and column 3, lines 45-56 of Klennert et al (U.S. Patent 6,614,388 B2).
